

the Future of Platform Engineering

What is Platform Engineering?

Platform engineering simplifies software delivery through internal tools.

- Builds reusable platforms to automate common tasks for developers.
- Enforces best practices and standardization across the organization.
- Speeds up deployment cycles, reducing complexity and manual work.

Why Atmosly for Platform Engineering?

Atmosly as a self-service DevOps platform for cloud-native applications.

- Reduces overhead for DevOps teams by automating infrastructure management.
- Uses Terraform to create consistent environments, whether on AWS, Azure, or GCP.
- Provides a unified platform for managing Kubernetes clusters and CI/CD pipelines.

FinOps Benefits with Atmosly

Optimizing cloud costs through
automation and resource allocation.

- Automated scaling based on resource needs reduces unnecessary costs.
- Real-time monitoring provides visibility into cloud spend.
- Integrates tools like Opencost for detailed cloud cost analysis and recommendations.

Key Benefits

Main benefits of **Atmosly** for platform engineering.

- Self-service capabilities empower development teams to manage infrastructure.
- Ensures consistency across environments using predefined project blueprints.
- Supports multi-cloud environments, offering flexibility and reducing lock-in.
- Seamless integration with existing CI/CD tools to streamline the deployment process.

Use Case: Cost Efficiency

Example of cost reduction
using **Atmosly's** features.

- Client reduced cloud costs by 20% using automated resource scaling.
- Improved deployment efficiency, leading to faster time-to-market for applications.

Future Trends

The role of AI/ML in
platform engineering.

- AI/ML can predict resource needs, further optimizing cloud spend.
- Automation will become more intelligent, reducing manual oversight.

Atmosly's platform engineering helps optimize performance and costs.

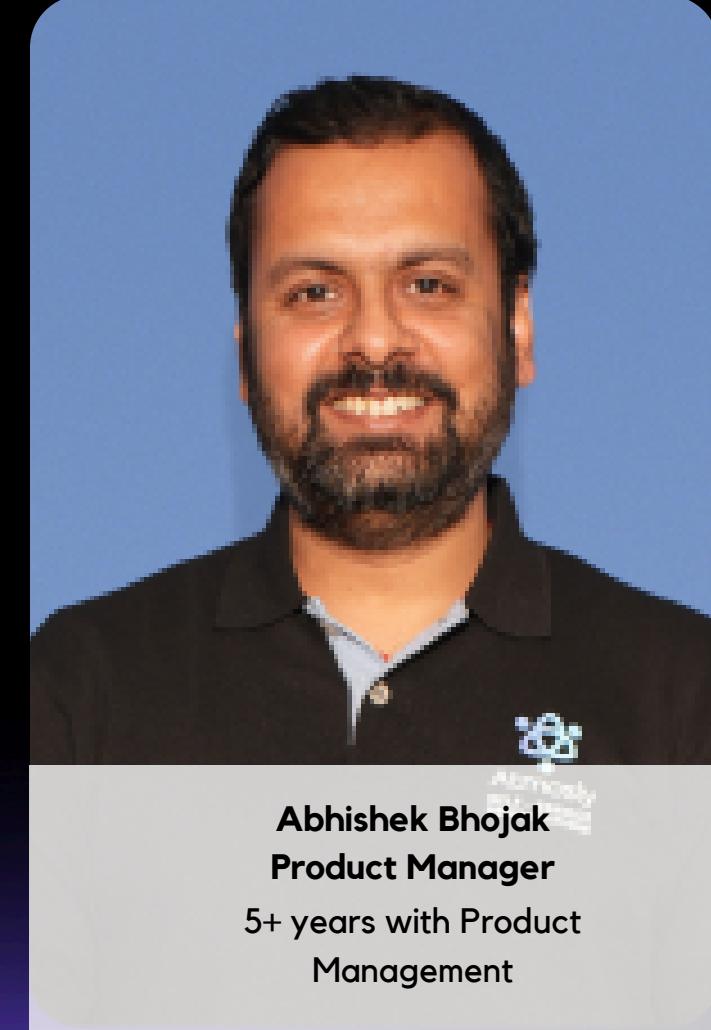

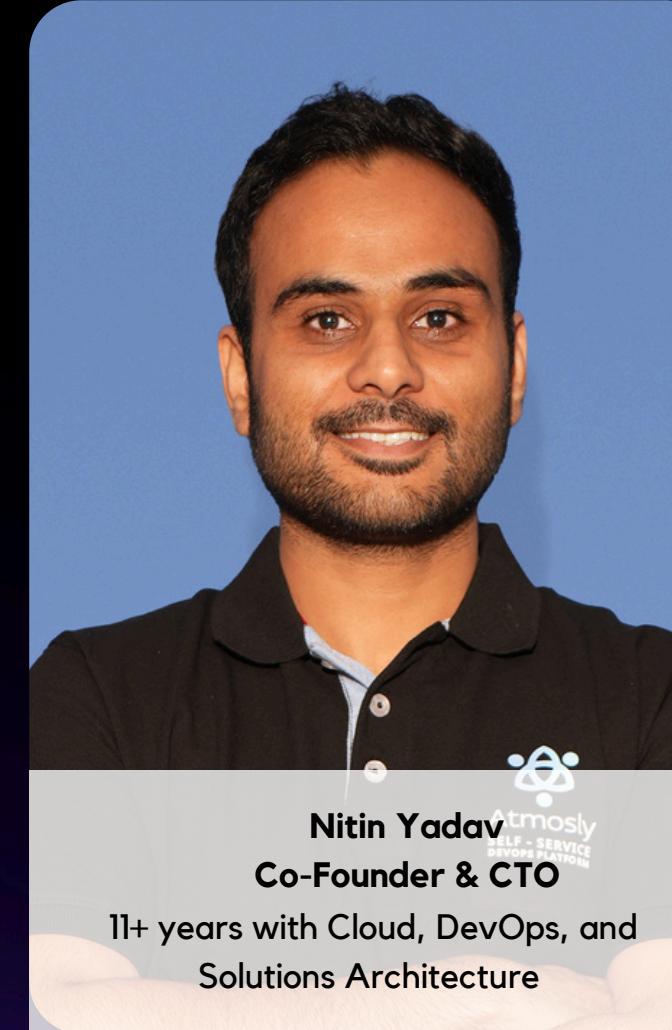

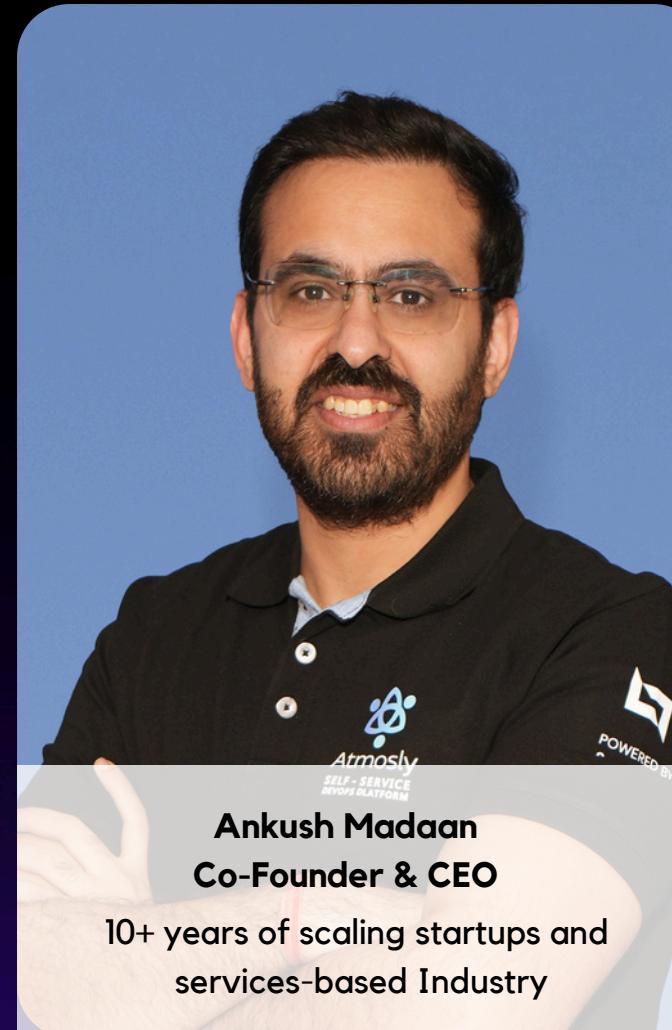

- FinOps integration allows better control of cloud expenses.
- Atmosly is built for scalability, ensuring efficient cloud operations.

Meet The Builders

The driving forces behind our success.

Meet the dedicated minds and passionate hearts that power our vision.

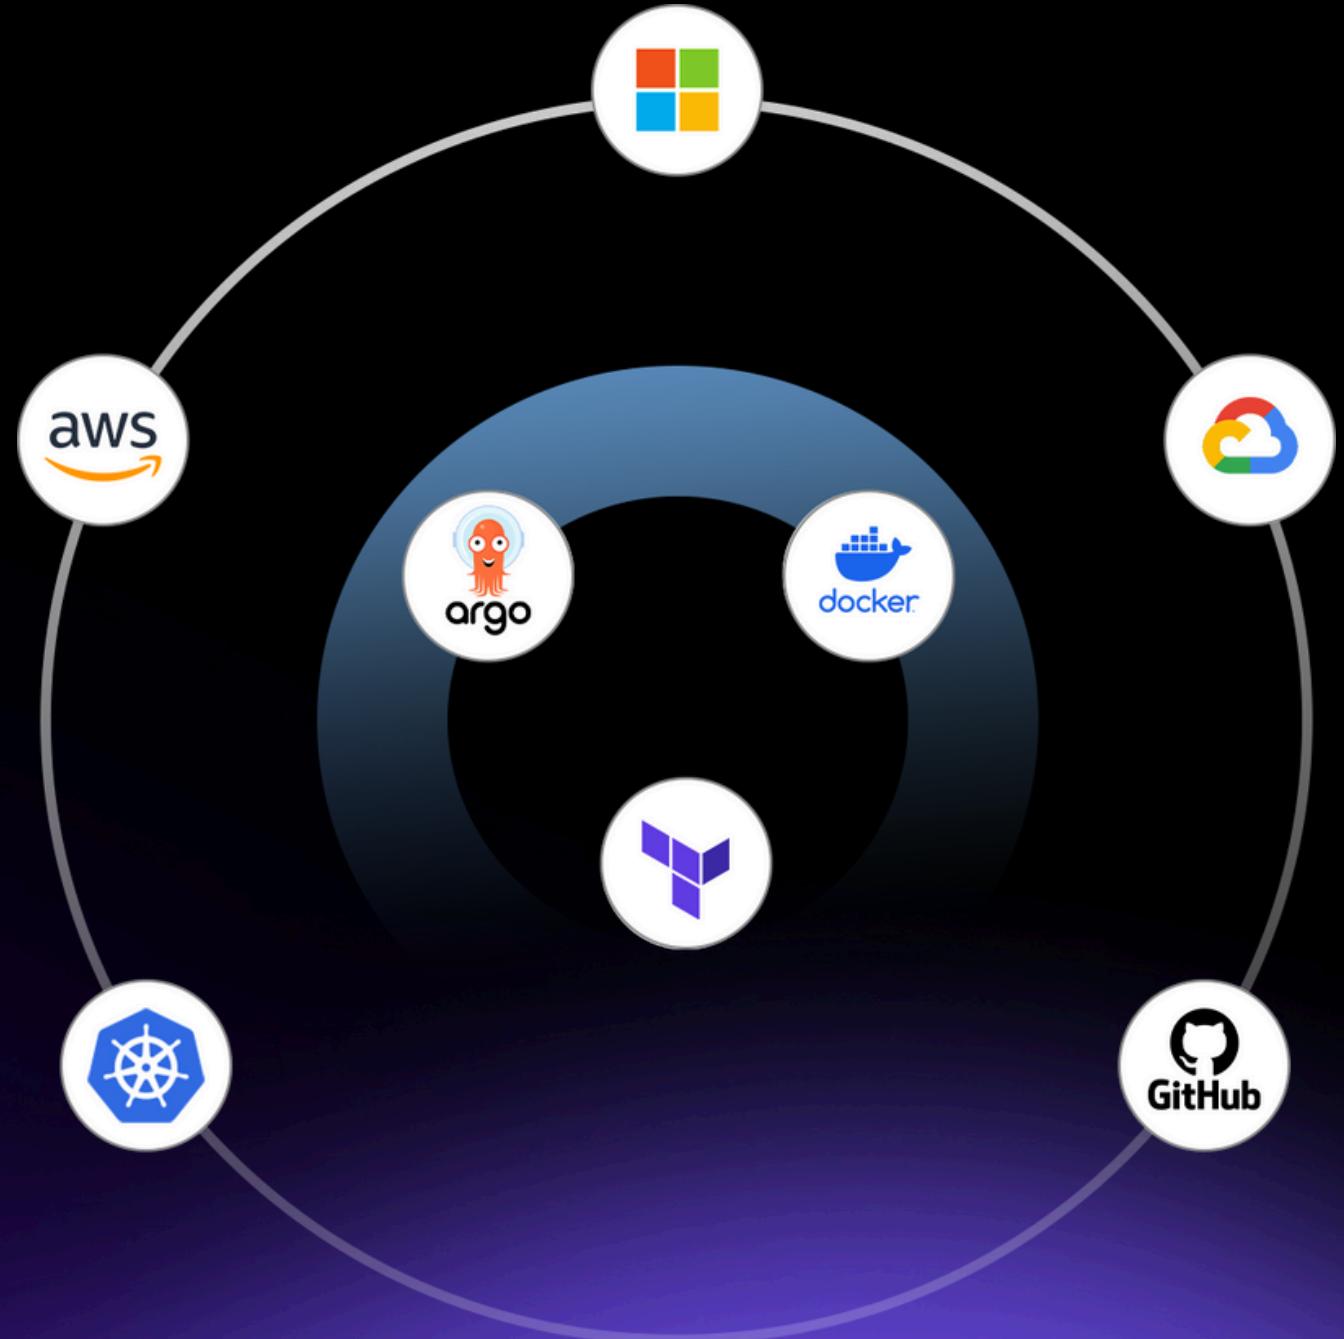

Get Started Today: Experience the Future of DevOps Automation

Are you ready to embark on a journey of transformation? Unlock the potential of your DevOps practices with Atmosly.

Join us and discover how automation can redefine your software delivery, increase efficiency, and fuel innovation.
